Easy purchasing process

MODULAR LIVE FIRE QUICKRANGE™

QuickRange™ Live Fire modular training ranges coupled with the AIS Live Fire PRISim® judgment simulator, provide a unique training environment wherein military and law enforcement professionals can combine live fire with video-based and CGI interactive scenarios for unprecedented training realism.

The commercial, “off-the-shelf” purchasing process, along with the affordability, portability and convenience of QuickRange™ make it an ideal shooting range solution for firearms training professionals. By eliminating problems associated with building a traditional shooting range (planning, budgeting, design, construction, installation, etc.) QuickRange™ is the ultimate solution to having a high quality shooting range - within a few months, not years. It can be installed on your site within 180 - 210 days after receipt of order.

TRAINING ON YOUR TERMS

QuickRange™ is PRISim® ready allowing live fire simulation to be included at the time of purchase or added later. QuickRange™ provides capability to shoot live fire in either “Static” or “Tactical” configurations. The premium modular design is pre-engineered to ensure the highest quality and 100% ballistic containment. It can be customized to the user’s needs, from 2 to 24 shooting lanes and lengths from 40 to 200 feet or more.

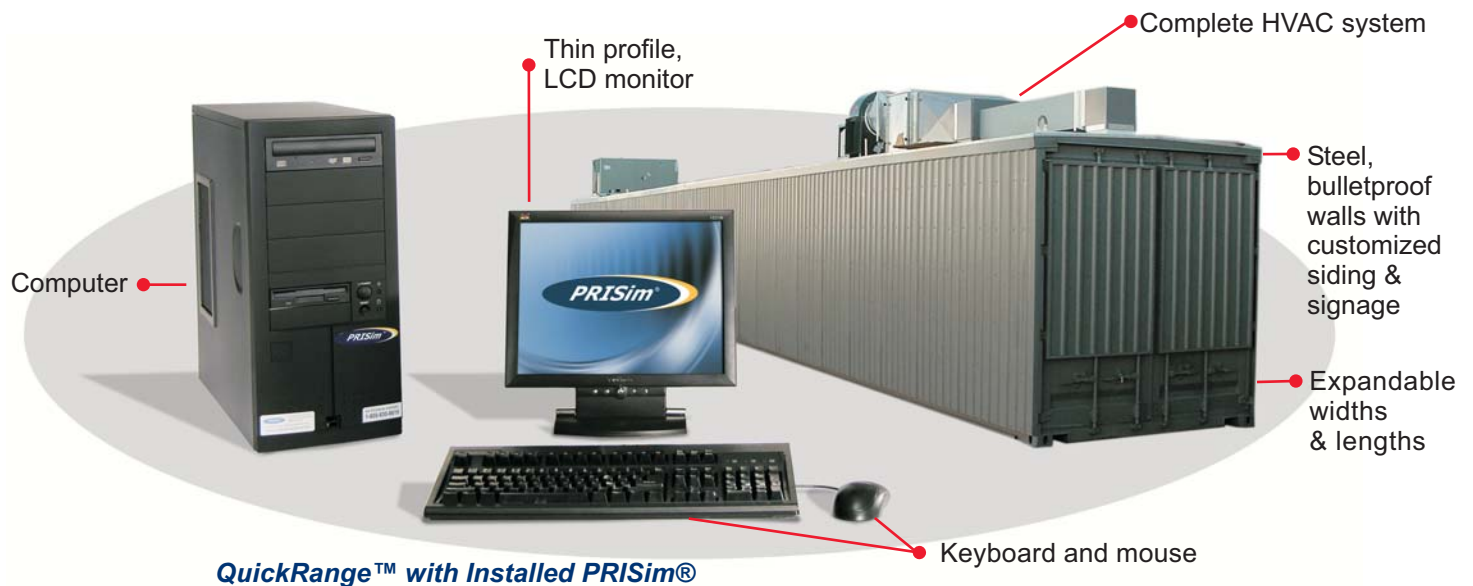

QuickRange™

with PRISim®

PRODUCT FEATURES:

- Truly modular, expandable and reconfigurable live fire range can either be placed inside a building or stand alone with minimal site preparation
